N,Alternate names: cysteine proteinase inhibitor
C;Species: Oncorhynchus keta (chum salmon)
C;Date: 14-Jul-1994 #sequence_revision 14-Jul-1994 #text_change 16-J
C;Accession: JC2040
R;Koide, Y: Noso, T.
Biosci. Biotechnol. Biochem. 58, 164-169, 1994
A;Title: The complete amino acid sequence of pituitary cystatin from A;Reference number: JC2040; MUID:94162738; PMID:7764512
A;Accession: JC2040
A;Molecule type: protein
A;Residues: 1-111 <KOI>
C;Comment: The intracellular role of this protein is the inhibition C;Superfamily: cystatin; cystatin homology
C;Keywords: cystatin proteinase inhibitor
F;2-111/Domain: cystatin homology <CYS-
F;48-52/Region: inhibitory
F;89-109/Disulfide bonds: #status experimental

!:
         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    DB 08
